

FAMILY Carabidae

GENUS *Limodromus*

SPECIES *L. assimilis* / *longiventris*

*Limodromus assimilis*

- Elytra oval, pronotum heart-shaped, 10-12.5 mm
- Hygrophilous, but relatively eurytopic, moist forests and grassland

*Limodromus longiventris*

- Elytra more parallel, pronotum broader, 12-14 mm
- Swampy edges of creeks and rivers, reed zones along oxbow lakes
